Most but not all of the above Nets operate daily

TRANSGLOBAL J0G HF NET

The Joint Services Trans Global Net is a joint network in which traffic enters and is forwarded between Regions.

MILITARY SUPPORT NETWORK (MSN)

The mission of the National Support Network (MSN) is to provide contingency radio communications support to the DoD Components. The MSN is an authorized 24 hour, 7 days a week HF Emergency communications on-the-air point-of-contact for MSN Users, who are unable to make contact on other frequencies, telephone, etc. due to propagation, or other reasons. It provides common operating frequencies, knowledgeable Net Control and member stations ready to assist with training, exercises and actual events with assets available to the U.S. military.

USAF MARSRADIO PHONE PATCH NETWORK (PPN)

The Joint Services Phone Patch Network, provides a service for Military, designated Federal or State agency units in flight or on the ground to make official business patches, morale phone patches and radio checks via an authorized MARS phone patch station. It is led by USAF MARS. Ground stations use USAF MARS call signs and are authorized to provide operational frequencies over the air and in the open without reference to designators. Aircrews calling for assistance use the Collective call sign: MARS RADIO.
